ABAP Platform 2020 runs on top of
Kernel 7.81. The new Kernel 7.81 is a
non Downwards Compatible Kernel
(non-DCK) with previous SAP Kernel
versions and therefore is the perfect
opportunity to clean obsolete
parameters that were deprecated time
ago but were still maintained for
compatibility reason with old kernels.

With the new internal table constructs in ABAP 7.2 and ABAP 7.4 we have the ability to create ABAP code with fewer statements for the same functionality, without compromising readability of the code. New built-in functions like `LINE_INDEX` and `LINE_EXISTS`, and new constructor operators such as `CORRESPONDING` allow us more flexibility and extensibility when developing and maintaining our ABAP code.

~~New Features in ABAP 7.4~~ — Internal Tables

SAP ABAP General ABAP Language 7.4 bring a lot of brand new functionality, this article will focus on the large number of new features that have been introduced into ABAP 7.4. These features are divided into the following categories database access,

In ABAP 7.4 release, we have new syntax `LINE_INDEX ()` to identify the index of a row when a condition is met while reading the internal table. The new syntax is similar to `READ TABLE` with `TRANSPORTING NO FIELDS` followed by `sy-subrc check`. if `sy-subrc = 0`, then `sy-tabix` will give the index of the row.
