An Introduction To Sas 70 Audits

SAS 70 is the old standard that was never designed for certain service organizations that offer colocation, managed dedicated servers or cloud hosting services. It was initially established to provide auditors information and verification about data center controls and processes as it relates to the data center user and their financial reporting.

SAS 70, SSAE 16 and SOC Comparison | OTAVA

June 15, 2011. Historically, SAS 70 audit/attestation reports were most relevant to auditors. However, with the introduction of the Sarbanes-Oxley Act in 2002, internal controls over financial reporting stepped into the spotlight. It seemed suddenly that every publicly-traded company was requesting SAS 70 audit reports because nearly every company utilized at least one service organization.
