~~Feeding twins and multiples~~ — NHS
At the beginning of the second trimester, babies are about 3 1/2 inches long and weigh about 1 1/2 ounces. Tiny, unique fingerprints are now in place, and the heart pumps 25 quarts of blood a day. As the weeks go by, your baby's skeleton starts to harden from rubbery cartilage to bone, and he or she develops the ability to hear.

actions—and responding appropriately to them—is the key to giving your child a head start to a healthy and happy future. Now the authors of the bestselling *Baby Minds* and *Baby Signs* translate the latest research on the rich inner life of babies into practical, fun activities that will foster your child's emotional skills during the most critical period—between birth and age three. This comprehensive guide will help you help your child express emotions effectively, develop empathy, form healthy friendships, and cope with specific challenges. Learn how to:

- Talk with your child about emotions in order to help him recognize and control his own
- Use face-to-face interaction,

tone of voice, song, and touch to make your infant feel safe and secure

- Start a gratitude journal to help your child appreciate the good things in life
- Nurture self-esteem with “try, try again” activities and simple chores
- Create a “What are they feeling” deck of cards to help your child understand and practice emotions
- Use games and songs to help your child practice self-control
- Overcome temper tantrums, aggression, shyness, separation anxiety, and other challenges

It's as easy as waving bye-bye! Babies have a lot to say, even before they can actually speak familiar animal names like "dog" and "bunny." Baby Signs are simple gestures that allow babies and toddlers to communicate what they see, what they need, and even how they feel. Research has shown that Baby Signs decrease frustration and tantrums and help your baby talk sooner.

When to begin: When your child starts to wave bye-bye. How to do it: Show your baby the sign and point to the picture. Always say the word as you make the sign. Improvise: Make up your own signs -- your baby probably will

Demonstrates signs for objects such as hat, book, and telephone, that babies can use to communicate with adults.

Babies want to express their needs, especially at mealtime. Through baby signing, they can communicate when they want more, when something is too hot, or even to let everyone know it's 'all gone!' Baby signing is easy and natural. Infants and toddlers can learn how to say what they need, what they see, and even what they feel long before their vocal chords are developed enough to let them use actual words. Both books include the most popular signs and provide

Stories about transgender transformation are increasingly in the news. Children find themselves dealing with a subject they probably don't know too much about. It can be difficult to find a source that provides the answers they need in a way they can understand. Author Jenson Hillenbrand's *Parts and Hearts: A Kid's (and Grown-Up's) Guide to Transgender Transition* helps readers understand transgender transformation, both male to

Female and female to male.

Aimed at children between the
ages of nine and twelve,

Hillenbrand's work, with the
accompanying illustration by
Quinlan Omahne, helps readers
understand what transgender
transformation means and what it
involves. Parents can use it as a
resource to explain the subject to
their children in an age-
appropriate manner as well as
prepare themselves to answer the
many questions children will likely
have. Transgender transformation
can be difficult for children and
some adults to understand. This
book shows it's natural and not a
scary thing as some may think.

Divided into three parts, this book was written to foster healing for divorcing parents and to help divorcing couples support their children. Part one deals with interpersonal issues and individual growth. The reader is lead through the personal processes of divorce; actions parents can take to help themselves and their children adjust to the situation are highlighted. Some of the topics covered here include shared parenting, a child's perspective, repairing the damage, security and reassurance, domestic violence, difficult divorces, and redefining the family. Part two examines the legal system. It is

hoped that by demystifying the legal process, divorce will become less frustrating and will afford the individual more choices. Some of the issues addressed here are legal issues in parenting, the mechanics of co-parenting, and finances and the reality of divorce. In part three, entitled "Medicine for the Heart," children share their experiences with divorce. Over 50 children were interviewed about their parents' divorce and how it affected them. They offer advice to parents about how to make divorce easier on other children. (RJM)
