The phrase "work smarter, not harder" has been repeatedly ridiculed in the Dilbert comic strip and elsewhere, not because it is a bad idea, but because it is thrown like a brick lifesaver to drowning employees. To tell someone to work smarter is like telling someone to be happier, healthier, and richer. It's not much help to merely repeat the objective; what people need is a plan for achieving the objective. In *Making Great Decisions*, we show our readers how to achieve their objectives. We write to help those in business and those in the business of life--i.e., everyone--to work smarter. Our ideas are both simple and powerful. We offer a better way to look at problems so that the solutions are easier to find.

We help supplement our readers' clear thinking by summarizing some of the most powerful techniques we have discovered. Have you ever driven through corn country? From a distance, all you see are corn stalks and more corn stalks in a jumbled mess. Then suddenly, when you get closer, your perspective changes, and you can see down the rows and realize that the corn was planted perfectly in straight lines. Your perception of the crop changes from a messy jumble to a clear picture simply because you're in the right spot. This book puts readers in that ideal spot. So many problems seem like hopeless jumbles but then, when you start using the techniques we discuss here, they start to look as straightforward as the straightest line in an Iowa cornfield. That You Must Report this book is that, over the years, both of us have regularly come across people in organizations--often bright people with MBAs or other graduate degrees--who don't think they have time, energy, or skills to make good decisions. They have many clues but don't know how to put them together. They regularly face situations that they could analyze with some of the tools they learned in their courses, but they don't realize that. We don't hold ourselves apart from this group, and stories of our successes and failures are sprinkled throughout Making Great Decisions in Business and Life.

Making strategy requires undertaking major—often irreversible—decisions aimed at long-term success in an uncertain future. All leaders must formulate a clear course of action, yet many lack confidence in their ability to think systematically about their strategy. They struggle to apply the abstract lessons offered by conventional approaches to strategic analysis to their unique contexts. Making Great Strategy resolves these challenges with a straightforward, readily applicable framework. Jesper

B. Sørensen and Glenn R. Carroll show that one factor underlies all sustainably successful strategies: a logically coherent argument that connects resources, capabilities, and environmental conditions to desired outcomes. They introduce a system for formulating and managing strategy through a set of three core activities: visualization, formalization and logic, and constructive argumentation. These activities can be implemented in any organization and are illustrated through examples and case studies from well-known companies such as Apple, Walmart, and The Economist. This book shows that while great strategic thinking is hard, it is not a mystery. Widely applicable and relevant for managers and leaders at all levels, especially executive teams charged with setting the course of their

organizations, it is essential reading for anyone faced with practical problems of strategic management.
