breakthrough thinking: coming up with successful innovative ideas through eliminating contradictions towards the highest degree of ideality. Instead blind search and jumping to ideas and conclusions, one can thoroughly analyze an innovative problem or challenge, extract contradictions and resolve them in "win-win" way.

## About

New thinking stimulated by TRIZ creates new possibilities. The famous contradiction, which is a foundation for modern physical sciences, is light is both a particle and a wave. Both are true, yet both cannot be true at the same moment in time.
