information on the standards of purity, description, test, dosage, precaution, storage, and the strength for each drug. It is published in three volumes, and contains up to 4567 monographs with 1386 new admissions. In Volume I, it contains monographs of Chinese crude drugs and the prepared slices. Vegetable oil/fat and its extract, the patented Chinese traditional medicines, single ingredient of Chinese crude drug preparations etc. it has 2165 monographs with 1019 new admissions (439 articles of the prepared slice) and 634 revised; Volume II deals with monographs of chemical drugs, antibiotics, biochemical preparations, radiopharmaceuticals and excipients for pharmaceutical use, contains 2271 monographs with 330 new admissions and 1500 revised; Volume III contains biological products, has 131 monographs with 37 new admissions and 94 revised

The Pharmacopoeia of the People's Republic of China 2015 Edition is the 10th edition of the Chinese Pharmacopoeia. It provides the statutory requirements for foreign pharmaceutical companies producing medicines for the Chinese market.

This book is the first volume of a comprehensive 2-volume book covering modern pharmacological and clinical studies of the most commonly used Chinese herbal drugs. It contains monographs of 250 kinds of the most commonly used Chinese Materia Medica. The information on each herb was compiled by a research specialist active in the scientific investigation of that particular type of herb. The description on each drug includes an introduction (source, character and taste, actions and indications according to traditional Chinese medicine etc.), chemical composition, pharmacology, clinical studies, adverse

effects and references. The translation of the book into English was done by qualified professionals in the field and the terms used are consistent with those used in Index Medicus, Chemical Abstracts and Botanical journals.

This is the 2005 English edition of Chinese Pharmacopoeia which is compiled by the State Pharmacopoeia Commission of the Ministry of Public Health. The data is effective from July 2005 and includes information on standards of purity, descriptions and dosage, with a total of over 3200 monographs of drugs with 525 new admissions. The publication is in three volumes: volume one contains 1146 monographs of drugs including Chinese materia medica and traditional patent medicines; volume two contains 1967 monographs relating to chemical drugs, antibiotics, biochemicals, radiopharmaceuticals and excipients for pharmaceutical use; and volume three has 101 monographs on biological products.

Responding to the increased popularity of herbal medicines and other forms of complementary or alternative medicine in countries around the world, this reference reviews and evaluates various safety, toxicity, and quality-control issues related to the use of traditional and herbal products for health maintenance and disease prevention and treatment. With over 3,550 current references, the book highlights the role of herbal medicine in national health care while providing case studies of widely used herbal remedies and their effects on human health and wellness and the need for the design and performance of methodologically sound clinical trials for the plethora of herbal medicines.

Records cataloging the healing powers of natural substances - plants, minerals, and animal byproducts - date back more than 4,000 years. There is no denying the effectiveness of traditional Chinese medicine, yet - until recently - the roots of this knowledge were largely lost in superstition and folklore. However, the use of herbs as an alternative medical treatment for many illnesses has increased steadily over the last decade, particularly since such herbs are categorized as "Natural Food Products" and are not yet subject to strict control by the FDA. Reports published in 1996 indicate that more than 10% of the US population has used herbal remedies. This book does not debate the value of Eastern or Western medicine but brings together Chinese herbal lore and Western scientific methods in a current, comprehensive treatise on the pharmacology of Chinese herbs. This second edition of *The Pharmacology of Chinese Herbs* presents the chemical composition, pharmacological action, toxicity, and therapeutic value of 473 herbs. The book:

- Classifies herbs according to their therapeutic value
- Informs how active ingredients in herbs may adversely interact with other herbs or drugs
- Evaluates which herbs have the potential for more investigation and possible use as drugs
- Describes the pharmacological action of each herb based on recent scientific study and describes each herb according to Chinese pharmacopoeia and folk medicine
- Provides a review of Chinese medical history
- Presents information on how to use modern chemical techniques for enhancing or modifying herbal ingredients into better agents with more strength and activity

What's New in the Second Edition

- Discussions on: Herbs and their specific effects on the immune system
- Herbs and fertility/infertility
- Anti-cancer herbs
- Anti-HIV herbs
- Anti-malarial herbs
- Ginseng and ginsenosides
- Anti-Alzheimer herbs
- Herbs affecting the nervous system

Download Ebook Chinese Pharmacopoeia Edition 2

Traditional Chinese medicine has been used for thousands of years by a large population. It is currently still serving many of the health needs of the Chinese people; and still enjoying their confidence it is practised in China in parallel with modern Western medical treatment. In addition to scientific organisations dedicated to modern Western medicine, e. g. the Chinese Academy of Medical Sciences and various medical schools, a series of parallel institutions have been established in China to promote traditional Chinese medicine, such as the Academy of Traditional Chinese Medicine and training institutions. Almost all hospitals in China have a department of traditional medicine. Furthermore, a large number of scientific journals are dedicated to traditional Chinese medicine, covering both experimental and clinical investigations. Medicinal materials constitute a key topic in the treatment of disease according to traditional Chinese medicine. The Chinese Pharmacopoeia (1985 edition) is therefore divided into two separate volumes, Volume I containing traditional Chinese medicinal materials and preparations and Volume II containing pharmaceuticals of Western medicine. The oldest Chinese review of medicinal materials, Shennong Bencao Jing (100-200 A. D.), covered 365 herbal drugs. The classic compilation in this field, Bencao Gangmu (Compendium of Materia Medica), was published in 1578 by Li Shi-zhen and recorded as many as 1898 crude drugs of plant, animal and mineral origin.

This standard applies to bromobutyl rubber plungers and liners for pen-injectors sleeves.
