A collection of essays by the art historian Aby Warburg, these essays look beyond iconography to more psychological aspects of artistic creation: the conditions under which art was practised; its social and cultural contexts; and its conceivable historical meaning.

Drawing on a vast range of sources Arabian Seas 1700 - 1763 is as much a sweeping overview as a detailed examination of the maritime world of the western Indian Ocean in the eighteenth century. It deals with the various states, economies

This case study of the Peruvian altiplano, the vast high-altitude plains surrounding Lake Titicaca, combines economic and social analysis with cultural and institutional history. Nils Jacobsen challenges the prevailing view that the rural Andes underwent a successful transition to capitalism between the mid-nineteenth and early twentieth centuries. He argues that although the

political, economic, and administrative structures of colonialism were gradually dismantled by the region's advancing market economy, colonial modes of constructing power and social identity have lingered on even to this day. The result of painstaking research in remote rural archives, some of them now made inaccessible by the Shining Path, *Mirages of Transition* will become the definitive work on the Peruvian highlands.

colonialism, sugar cultivation and export became one of the chief commercial industries in the Philippines. Both the Filipino people and the colonizing forces participated in the sugar industry; a few profited enormously. John Larkin examines how the international sugar market and local culture forged two types of society, one based on plantation agriculture, the other on tenant farming. Larkin investigates the history of the two most important sugar-producing regions, Negros Occidental and Pampanga. He depicts the impact of colonial economic

forces on the rise of the elite plantation-owning class, the subsequent gap that developed between the extraordinarily wealthy and the impoverished, and the nation's dependence on the international market. Larkin concludes that the sugar industry resulted in stunted economic development, wide cleavages among the Filipino people, and an imbalance of political power - all effects that are still felt today. Sugar and the Origins of Modern Philippine Society is an indispensable contribution to our understanding of Southeast Asian history and the industry vital to the
