two classic books, CORDWOOD MASONRY HOMES and EARTHWOOD, plus a decade of new information, new lessons to avoid pitfalls, and new ideas, this book offers a complete update on this dynamic housebuilding method.

Cordwood building—log-ends set in insulated mortar—is a versatile, economical, low-impact, and beautiful building method. Its durability and performance has been proven in beautiful, centuries-old buildings in North America and Europe. Yet until now, there has been no trusted, practical guide to cordwood construction using the material in a wide variety of construction projects. Distilling decades of experience and best practices, *Essential Cordwood Building* is the first fully illustrated, step-by-step guide to cordwood building. Ideal for the DIYer and professional designer and builder alike, it covers:

- Wood species selection, log-end length, and seasoning
- Cement, lime putty, and cob mortar options
- Wall cavity insulation options
- Budgeting and estimating
- Highly illustrated, step-by-step building techniques
- Window and door frame installation, pointing and chinking, finishing, and plastering
- Special designs and decorative features
- Code references, compliance, building science, and best practices
- Troubleshooting and maintenance

*Essential Cordwood Building* is part of New Society's Sustainable Building Essentials Series. Series editors Chris Magwood and Jen Feigin have scoured the world of sustainable building to bring you the techniques and systems that deliver measurable benefits in terms of greater efficiency and reduced environmental impacts. Written by the world's leading

sustainable builders, designers, and engineers, these succinct, user-friendly handbooks are indispensable tools for any project where high performance and low impact are key goals. Get the essentials! Rob Roy is widely recognized as a world leading authority on cordwood construction. He is Director of Earthwood Building School in West Chazy, New York, which teaches owner-builders how to build with cordwood masonry. Rob has authored and edited fifteen books, including Cordwood Building, Timber Framing for the Rest of Us, Earth-Sheltered Houses, and Stoneview.

Updated 2015: 259 color photos, diagrams and formulas will take the novice or experienced builder from house plans to cordwood home occupancy. Sections include: mortar mixes, R-values, code compliance, types of wood, drying wood, shrinkage tables, foundations, how we became mortgage-free, post & beam framing, formulas for estimating materials, homeowners insurance, Cordwood Conferences 2005 & 2011 summary, Best Practices with cordwood construction, lime putty mortar, cob, paper enhanced mortars, Permachinking walls, building codes, color photo album, making stained glass bottle ends, how-to "mortar-up" a cordwood wall, tuck pointing, FAQ's, maintenance, weight of a cordwood wall, cost analysis, Cordwood Education Center, White Earth Reservation cordwood home, a condensed version of Cordwood Cabin is included (which is architecturally drawn and state code approved and now serves as a classroom for the local public school), 196 pages and much, much more. Updated and revised 2015.

# Download Free Cordwood Building Comprehensive State Art

All those of us without traditional skills need to know to build with timber framing. Many natural building methods rely upon the use of post and beam frame structures that are then in-filled with straw, cob, cordwood, or more conventional wall materials. But traditional timber framing employs the use of finely crafted jointing and wooden pegs, requiring a high degree of craftsmanship and training, as well as much time and expense. However, there is another way... Timber Framing for the Rest of Us describes the timber framing methods used by most contractors, farmers, and owner-builders, methods that use modern metal fasteners, special screws, and common sense building principles to accomplish the same goal in much less time. And while there are many good books on traditional timber framing, this is the first to describe in depth these more common fastening methods. The book includes everything an owner-builder needs to know about building strong and beautiful structural frames from heavy timbers, including: the historical background of timber framing crucial design and structural considerations procuring timbers-including different woods, and recycled materials foundations, roofs, and in-filling considerations the common fasteners. A detailed case study of a timber frame project from start to finish completes this practical and comprehensive guide, along with a useful appendix of span tables and a bibliography. Highly illustrated, this book enables 'the rest of us' to build like the professionals and will appeal to owner-builders, contractors and architects alike.

Step-by-step instructions for building an octagonal

cordwood masonry guesthouse.

Learn how to identify, locate, and effectively use alternative building materials, including cob, adobe, rammed earth, bamboo, cork, wool carpeting, and more. You will also learn about the structure, climate control, siting, foundations, and flooring options you gain when using these materials. Ultimately, you will come to understand that these materials are cheaper, easier to build with, stronger, more durable, and more fire resistant.

Many copies in stock but still heavy demand; only a few titles published on this subject. Very popular in rural WA too.
