Restoring dignity to sudden death.

Teaches lay rescuers how to recognize the most common life-threatening emergencies in the workplace, when to call for help, and how to perform lifesaving skills until professional help arrives.

The questions are divided into two sections - 100 scenario-based questions present clinical vignettes with questions to test students' knowledge within a specific context and 200 knowledge-based questions offering a wide mix and variety of questions encompassing all of the major medical and surgical specialties. Detailed answers and explanations will help to develop students' learning and understanding.

With an editorial team of leading experts from the American College of Emergency Physicians and the American Heart Association, this book is the first complete, clinically oriented reference textbook in emergency cardiovascular care and CPR. The book translates bench research to the clinician's bedside needs and addresses end-of-life issues. The content is appropriate for a large audience including early caregivers, emergency department and CCU nurses, students, residents, fellows, and hospitalists responsible for cardiovascular emergency situations. A companion Website will include the fully searchable text, instructional videos produced by the AHA, and links to ACC, AHA, ASE, ACEP, and ILCOR guidelines and policy statements.
