What an Engineering Drawing Does. Engineering drawings describe a specific outcome. They don't designate a process to get to the said outcome. One could create a process to create the desired outcome. Ultimately, a specific vendor will need to create an internal process to create the drawing's resultant objective. Each fabrication process will be unique at some level.

### BASIC ENGINEERING DRAWING - WikiEducatr

An engineering drawing is a type of technical drawing that is used to convey information about an object. A common use is to specify the geometry necessary for the construction of a component and is called a detail drawing. Usually, a number of drawings are necessary to completely specify even a simple component. The drawings are linked together by a master drawing or assembly drawing which gives the drawing numbers of the subsequent detailed components, quantities required, construction materia
