~~Stanford~~ REVEL for Exploring Biological Anthropology: The Essentials combines concise coverage of the foundations of the field with modern innovations and discoveries, helping students understand, and get excited about, the discipline. Because the authors conduct research in three of the main areas of biological anthropology – the human fossil record (Susan Antón), primate behavior and ecology (Craig Stanford), and human biology and the brain (John Allen) – they offer a specialist approach that ...

~~Stanford~~ Physical biological anthropology is the study of the past and present evolution of the human species and is especially concerned with understanding the causes of present human diversity. Within this broad definition it encompasses fields as disparate as human palaeontology, evolutionary biology, human genetics, comparative anatomy and physiology, primate behaviour, human behavioural ecology, and human biology.
