If you are interested in a straight forward but comprehensive resource designed to support your preparation for the FE-Civil exam, this book is for you. The book contains 220 practice problems for the FE-Civil exam. In the first section, a complete set of 110 FE-Civil style solved problems are provided with detailed solutions for allowing quick review of all examination areas. In the second section, a full-length practice exam consisting of 110 questions is provided for self-assessment, followed by detailed solutions. In the third section, summary tables of final answers and a short discussion on historical changes to the FE exam are included for reference.

The FE Civil Review offers complete coverage of the Civil FE exam knowledge areas and the relevant elements—equations, figures, and tables—from the NCEES FE Reference Handbook. With concise explanations of thousands of equations, and hundreds of figures and tables, the FE Civil Review contains everything you need to successfully prepare for the Civil FE exam.

Effective January 2014, the Fundamentals of Engineering (FE) exams are drastically different. The new format, to be delivered via CBT (computer based testing), will become the norm in 2014. The exam can be taken throughout the year, unlike the twice a year schedule. The syllabus for the new FE CIVIL exam is very different from the one you would have taken if you took the paper test (last one October 2013). The test will now have approximately 5 hours and 20 minutes available for approximately 110 questions. In the past, AM questions were of the 2 minute variety and PM questions were of the 4 minute variety. Now, you have about 3 minutes per question. So, the average pace of the exam is about the same. This book has a full length practice exam with a mix of questions as recommended in the official syllabus (www.ncees.org). The only reference that should be used is the FE Reference Handbook, 9th edition, preferably the electronic (PDF) version, since the CBT exam will be supported by a PDF version of the handbook rather than a hardcopy. The practice exam contains questions from Mathematics, Probability & Statistics, Computational Methods, Ethics, Engineering Economics, Statics, Dynamics, Mechanics of Materials, Fluid Mechanics, Materials, Hydraulics & Hydrology, Environmental Engineering, Construction, Geotechnical Engineering, Surveying, Structural Analysis & Design & Transportation.
