An operating system is the most important software that runs on a computer. It manages the computer's memory and processes, as well as all of its software and hardware. It also allows you to communicate with the computer without knowing how to speak the computer's language. Without an operating system, a computer is useless.

Answers  
With virtual machine technology we can move from one Operating System to another by clicking the desired Operating System window directly. We can interact with one virtual machine at a given time. Thus, the correct answer is . There is no need to restart the system or logging off the system. Hence, options 'a' and 'd' are not correct. By pressing F2 key we cannot move from one Operating system to another.
