A leader in decision-making research reveals how choices are designed—and why it's so important to understand their inner workings Every time we make a choice, our minds go through an elaborate process most of us never even notice. We're influenced by

# Read Book How To Hack

subtle aspects of the way the choice is presented that often make the difference between a good decision and a bad one. How do we overcome the common faults in our decision-making and enable better choices in any situation? The answer lies in more conscious and intentional decision

# Read Book How To Hack

design. Going well beyond the familiar concepts of nudges and defaults, *The Elements of Choice* offers a comprehensive, systematic guide to creating effective choice architectures, the environments in which we make decisions. The designers of decisions need to consider all the elements involved in

# Read Book How To Hack

presenting a choice:  
how many options to  
offer, how to present  
those options, how to  
account for our natural  
cognitive shortcuts, and  
much more. These  
levers are unappreciated  
and we're often  
unaware of just how  
much they influence our  
reasoning every day.  
Eric J. Johnson is the  
lead researcher behind

# Read Book How To Hack

some of the most well-known and cited research on decision-making. He draws on his original studies and extensive work in business and public policy and synthesizes the latest research in the field to reveal how the structure of choices affects outcomes. We are all choice architects, for ourselves and for

# Read Book How To Hack

others. Whether you're helping students choose the right school, helping patients pick the best health insurance plan, or deciding how to invest for your own retirement, this book provides the tools you need to guide anyone to the decision that's right for them.

Our intention in this collection is to provide,

# Read Book How To Hack

largely through original writings, an extended account of pi from the dawn of mathematical time to the present. The story of pi reflects the most seminal, the most serious, and sometimes the most whimsical aspects of mathematics. A surprising amount of the most important mathematics and a significant number of

# Read Book How To Hack

the most important  
mathematicians have  
contributed to its  
unfolding directly or  
otherwise. Pi is one of  
the few mathematical  
concepts whose mention  
evokes a response of  
recognition and interest  
in those not concerned  
professionally with the  
subject. It has been a  
part of human culture  
and the educated

# Read Book How To Hack

imagination for more than twenty-five hundred years. The computation of pi is virtually the only topic from the most ancient stratum of mathematics that is still of serious interest to modern mathematical research. To pursue this topic as it developed throughout the millennia is to follow a thread through

# Read Book How To Hack

the history of  
mathematics that winds  
through geometry,  
analysis and special  
functions, numerical  
analysis, algebra, and  
number theory. It offers  
a subject that provides  
mathe maticians with  
examples of many  
current mathematical  
techniques as well as a  
palpable sense of their  
historical development.

# Read Book How To Hack

Why a Source Book?

Few books serve wider potential audiences than does a source book. To our knowledge, there is at present no easy access to the bulk of the material we have collected.

Curated by renowned security ambassador and experienced author Lisa Bock

Book Description

Biometric technologies provide a variety of robust and convenient methods to securely identify and authenticate an individual. Unlike a password or smart card, biometrics can identify an attribute that is not only unique to an

# Read Book How To Hack

individual, but also eliminates any possibility of duplication. Identity Management with Biometrics is a solid introduction for anyone who wants to explore biometric techniques, such as fingerprint, iris, voice, palm print, and facial recognition. Starting with an overview of biometrics,

# Read Book How To Hack

you'll learn the various uses and applications of biometrics in fintech, buildings, border control, and many other fields. You'll understand the characteristics of an optimal biometric system and then review different types of errors and discover the benefits of multi-factor authentication. You'll also get to grips with

# Read Book How To Hack

analyzing a biometric system for usability and accuracy and understand the process of implementation, testing, and deployment, along with addressing privacy concerns. The book outlines the importance of protecting biometric data by using encryption and shows you which factors to consider and how to analyze them

# Read Book How To Hack

before investing in biometric technologies. By the end of this book, you'll be well-versed with a variety of recognition processes and be able to make the right decisions when implementing biometric technologies. What you will learn Review the advantages and disadvantages of biometric technology

# Read Book How To Hack

Understand the characteristics of an optimal biometric system Discover the uses of biometrics and where they are used Compare different types of errors and see how to tune your system Understand the benefits of multi-factor authentication Work with commonly used biometrics such as face,

# Read Book How To Hack

fingerprint, and iris

Analyze a biometric system for usability and accuracy Address

privacy concerns and get a glimpse of the future of biometrics

Who this book is for Identity Management with Biometrics is for IT managers, security professionals, students, teachers, and anyone involved in selecting,

# Read Book How To Hack

purchasing, integrating, or securing a biometric system. This book will help you understand how to select the right biometric system for your organization and walk you through the steps for implementing identity management and authentication. A basic understanding of biometric authentication techniques, such as

# Read Book How To Hack

fingerprint and facial recognition, and the importance of providing a secure method of authenticating an individual will help you make the most of the book.

There are hundreds--if

*Page 60/73*

# Read Book How To Hack

not thousands--of techniques used to compromise both Windows and Unix-based systems.

Malicious code and new exploit scripts are released on a daily basis, and each evolution becomes more and more sophisticated. Keeping up with the myriad of systems used by hackers in the wild is

# Read Book How To Hack

a formidable task, and scrambling to patch each potential vulnerability or address each new attack one-by-one is a bit like emptying the Atlantic with paper cup. If you're a network administrator, the pressure is on you to defend your systems from attack. But short of devoting your life to becoming a security

# Read Book How To Hack

expert, what can you do to ensure the safety of your mission critical systems? Where do you start? Using the steps laid out by professional security analysts and consultants to identify and assess risks, Network Security Assessment offers an efficient testing model that an administrator can adopt, refine, and reuse

# Read Book How To Hack

to create proactive defensive strategies to protect their systems from the threats that are out there, as well as those still being developed. This thorough and insightful guide covers offensive technologies by grouping and analyzing them at a higher level--from both an offensive and defensive

# Read Book How To Hack

standpoint--helping administrators design and deploy networks that are immune to offensive exploits, tools, and scripts. Network administrators who need to develop and implement a security assessment program will find everything they're looking for--a proven, expert-tested methodology on which

# Read Book How To Hack

to base their own  
comprehensive  
program--in this time-  
saving new book.
