Trading for a Living Successful trading is based on three Ms: Mind, Method, and Money. Trading for a Living helps you master all of those three areas: * How to become a cool, calm, and collected trader * How to profit from reading the behavior of the market crowd * How to use a computer to find good trades * How to develop a powerful trading system * How to find the trades with the best odds of success * How to find entry and exit points, set stops, and take profits Trading for a Living helps you discipline your Mind, shows you the Methods for trading the markets, and shows you how to manage Money in your trading accounts so that no string of losses can kick you out of the game. To help you profit even more from the ideas in Trading for a Living, look for the companion volume--Study Guide for Trading for a Living. It asks over 200 multiple-choice questions, with answers and 11 rating scales for sharpening your trading skills. For example: Question Markets rise when * there are more buyers than sellers * buyers are more aggressive than sellers * sellers are afraid and demand a premium * more shares or contracts are bought than sold * I and II * II and III * II and IV * III and IV Answer B. II and III. Every change in price reflects what happens in the battle between bulls and bears. Markets rise when bulls feel more strongly than bears. They rally when buyers are confident and sellers demand a premium for participating in the game that is going against them. There is a buyer and a seller behind every transaction. The number of stocks or futures bought and sold is equal by definition.

What is that lyric in that one song? "The lure of easy money has a very strong appeal". Maybe you decided to get into the day trading business of investing and/or investing and trading because you saw some late-night TV commercial about day trading with flashy offers. Perhaps you received a spam e-mail touting some day trading method or system that said you could make easy money in the markets; I suggest you reconsider if that's the case. Death by Day Trading is for all beginning aspiring investors and traders who are just getting their head around doing the day trading business who go online and do a search to find information on how to do financial market trading and it should be the first book a brand new beginner reads before any other books on trading as far as I'm concerned and will be the most harsh and brutal day trading book they have ever read. Everyone has their own ideas of what they think day trading is and what it can do for them; you need to look at it from a realistic perspective from the start and Death by Day Trading is absolutely going to help you to do that. This book is for beginners and will detail many of the things that a brand new trader must learn not to do before they can become consistently profitable in the live markets. You're heard the saying "just say no to drugs"; just say no to day trading and you and your account will be waaaay ahead of the game to start off. Don't say I didn't warn you, OK; continue with your insanity and read the entire book to give yourself a fighting chance. Death by Day Trading can help you keep it simple and filter the huge amount of information out there down to only what you need to know right away and then can work towards adding more information and studies as you go. My trading philosophy is to start small and build on success have limited exposure while you hone your skills, then progress as you become more competent. You can use Death by Day Trading and the references, suggestions and tips in it to go further into your educational studies of the markets and there dynamics. Knowing market dynamics is going to be critical for you to have the winning edge you will need to be a successful market participant. By studying what this book suggests you will not become one of the 97% of the sheeple of the herd, don't become one of them.

Success as a day trader will only come to 10 percent of those who try. It's important to understand why most traders fail so that you can avoid those mistakes. The day traders who lose money in the market are losing because of a failure to either choose the right stocks, manage risk, and find proper entries or follow the rules of a proven strategy. In this book, I will teach you trading techniques that I personally use to profit from the market. Before diving into the trading strategies, we will first build your foundation for success as a trader by discussing the two most important skills you can possess. I like to say that a day trader is two things: a hunter of volatility and a manager of risk. I'll explain how to find predictable volatility and how to manage your risk so you can make money and be right only 50 percent of the time. We turn the tables by putting the odds for success in your favor. By picking up this book, you show dedication to improve your trading. This by itself sets you apart from the majority of beginner traders.
