As today ’ s teachers prepare to instruct a new generation of students, the question is no longer whether technology should be integrated into the classroom, but only “ how? ” Forced to combat shorter attention spans and an excess of stimuli, teachers sometimes see technology as a threat rather than a potential enhancement to traditional teaching methods. The Handbook of Research on Educational Technology Integration and Active Learning explores the need for new professional development opportunities for teachers and educators as they utilize emerging technologies to enhance the learning experience. Highlighting the advancements of ubiquitous computing, authentic learning, and student-centered instruction, this book is an essential reference source for educators, academics, students, researchers, and librarians.

Integrating Technology in English Language Arts Teacher Education investigates the technology practices teacher candidates in the US are being introduced to, how they are using these practices in classrooms, and how technology can be effectively integrated into English teacher education programs. By drawing upon findings from extensive longitudinal studies into teacher education programs in the US, this timely volume addresses critical themes relating to the integration of technology in education, including:

- Teaching with technology
- Technology for collaboration
- Technology for individualized learning and assessment

By analyzing the experiences of teacher educators and candidates, and offering detailed analysis of the content, practices, and skills being taught to pre-service English teachers, Pasternak examines the entities that drive or inhibit the adoption of technology into the secondary English language arts (ELA) curriculum. This volume will resonate with an international audience of post-graduate scholars and researchers interested in the fields of teacher education, English language arts, and the relationship between technology and classroom practice.

Teachers possess unique skills, knowledge and experience. So why should their approaches to classroom technology look the same? In *Integrating Technology in the Classroom*, author Boni Hamilton helps you discover technology tools and projects that resonate with your teaching style, classroom context and technology skill level — all while helping students achieve academic growth. In this book, every teacher can find new and immediately applicable ways to integrate technology in the classroom. Discover hundreds of tools and activities that support collaborative, student-centered learning, presented in order of complexity and difficulty to help you to build confidence and skills in each area. Explore how technology tools can support your instructional goals and help you meet the individual needs of visual, auditory, kinesthetic and multilingual learners. Filled with the stories of teachers who have successfully employed technology in the classroom, this book will help you revise your lessons to meet the ISTE Standards for Students in a way that works for you.

An engaging book for professional educators and an ideal textbook for certificate, masters, and doctoral programs in educational technology, instructional systems and learning design, *Foundations of Educational Technology, Second Edition* offers a fresh, interdisciplinary, problem-centered approach to the subject, helping students build extensive notes and an electronic portfolio as they navigate the text. The book addresses fundamental aspects of educational technology theory, research and practice that span various users, contexts and settings; includes a full range of engaging exercises for students that will contribute to their professional growth; and offers the following 4-step pedagogical features inspired by M. D. Merrill's *First Principles of Instruction*:
TELL: Primary presentations and pointers to major sources of information and resources
ASK: Activities that encourage students to critique applications and share their individual interpretations
SHOW: Activities that demonstrate the application of key concepts and complex skills with appropriate opportunities for learner responses
DO: Activities in which learners apply key concepts and complex skills while working on practice assignments and/or projects to be created for their electronic portfolios
The second edition of this textbook covers the core objectives addressed in introductory educational technology courses while adding new sections on mobile learning, MOOCs, open educational resources, "big data," and learning analytics along with suggestions to instructors and appendices on effective writing, professional associations, journal and trade magazines.
