Configuring Polycom Phones. Polycom provides several methods to configure or provision phones. The method you use depends on the number of phones, the phone model, and how you want to apply features and settings. You can use multiple methods concurrently to provision and configure features, but some methods have a higher priority than others when you use multiple methods concurrently —settings you make using a higher priority configuration method override settings made using a lower ...

Changes you make using the Web Configuration Utility override the settings you configure using a centralized provisioning server (if applicable). You can also import and export configuration files using the Web Configuration Utility to configure multiple phones using the same settings. For more information on using the Web Configuration Utility, see the Polycom Web Configuration Utility User Guide at the Polycom UC Software Support Center.
