Programming is really accessible and enlightening. The topic on pointers serves as a good example. Pointers are considered one of the most difficult, but at the same time one of the most important, topics in C. This book

~~Programming~~  
explains pointers  
really well. It does so  
by using simple  
language, examples  
and by using many  
illustrations.

Oualline's "Practical C Programming" is a pretty good book. I like and recommend it. Unfortunately his "Practical C++ Programming" is practically the SAME book. About 80% of this book is copied

word-for-word from his earlier book. This copying extends to the ridiculous. In Practical C Programming, he gives a couple examples of optimization.
