Let's Review Physics covers all topics in the New York State high school curriculum for physics and prepares students to pass the Physics Regents Exam. Topics covered include: motion in one dimension, forces and Newton's laws, vector quantities and their applications, circular motion and gravitation, momentum and its conservation, work and energy, the properties of matter, static electricity, electric current and circuits, magnetism and electromagnetism, waves and sound, light and geometric optics, solid-state physics, modern physics from Planck's hypothesis to Einstein's special theory of relativity, and nuclear energy. One recently-administered actual Physics Regents Exam is also presented with an answer key.

Written in a style and language that users without science backgrounds can understand. This best-selling introduction to the basic principles of chemistry draws on the reader's own experiences through analogies and cartoons to learn difficult concepts. The clear, systematic, thinking approach to problem solving has also been highly praised by reviewers and users alike. Countdown sections in each chapter, consisting of five review questions keyed to previous material provide readers with a basis for material introduced in the new chapter. Study exercises, found immediately after new topics are introduced, reinforce chapter problem material. You and Chemistry marginal application icon relates chemistry to the real world. End-of-chapter essays entitled Elements and Compounds relate the applications of specific elements or compounds to the readers' life.
