This book is open access under a CC BY License. It provides a comprehensive overview of the core subjects comprising mathematical curricula for engineering studies in five European countries and identifies differences between two strong traditions of teaching mathematics to engineers. The collective work of experts from a dozen universities critically examines various aspects of higher mathematical education. The two EU Tempus-IV projects – MetaMath and MathGeAr – investigate the current methodologies of mathematics education for technical and engineering disciplines. The projects aim to improve the existing mathematics curricula in Russian, Georgian and Armenian universities by introducing modern technology-enhanced learning (TEL) methods and tools, as well as by shifting the focus of engineering mathematics education from a purely theoretical tradition to a more applied paradigm. MetaMath and MathGeAr have brought together mathematics educators, TEL specialists and experts in education quality assurance from 21 organizations across six countries. The results of a comprehensive comparative analysis of the entire spectrum of mathematics courses in the EU, Russia, Georgia and Armenia has been conducted, have allowed the consortium to pinpoint and introduce several modifications to their curricula while preserving the generally strong state of university mathematics education in these countries The book presents the methodology, procedure and results of this analysis. This book is a valuable resource for teachers, especially those teaching mathematics, and curriculum planners for engineers, as well as for a general audience interested in scientific and technical higher education.

One of Julio Cortázar's great early novels. 'Anyone who doesn't read Cortázar is doomed.'--Pablo Neruda In its characters, themes, and preoccupations, Final Exam prefigures Cortázar's later fictions, including Blow-Up and his masterpiece, Hopscotch. Written in 1950 (just before the fall of Perón's government), it is Cortázar's allegorical, bitter, and melancholy farewell to an Argentina from which he was about to be permanently self-exiled. (Cortázar moved to Paris the following year.) The setting of Final Exam is a surreal Buenos Aires, dark and eerie, where a strange fog has enveloped the city to everyone's bewilderment. Juan and Clara, two students, meet up with their friends Andrés and Stella, as well as a journalist friend they call 'the chronicler.' Juan and Clara are getting ready to take their final exams, but instead of preparing, they wander the city with their friends, encounter strange happenings in the squares and ponder life in cafés. All the while, they are trailed by the mysterious Abel. With its daring typography, its shifts in rhythm as well as in the wildly veering directions of its characters' thoughts and speech, Final Exam breaks new ground in the territory of stream-of-consciousness narrative techniques. It is considered one of Cortázar's best works.

Freshman year is always a turbulent time: adjusting to dorm life, taking exams and talking to girls. The stress of moving to a brand new city will take its toll on anyone's emotions and mental health. But for Nicky, the first year of college will be more trying than any he has ever known. When he meets the girl next door, Debbie, their communication becomes inexorably tied to his fate and mental health. He begins to hear Debbie speaking to him telepathically, and instructing him in his faith. Struggling against psychosis and battling forces he doesn't understand, he must undergo a sublime and tragic downward spiral that will challenge his spirituality and force him to confront his demons. The world around him is changing and as his life comes to its crux he must confront and record his ultimate test. Join author Edward Dunn in taking The Final Exam. Edward Dunn is an Ivy League graduate and has studied Shotokan Karate for over seven years, and is a competitive tennis player. He is the author of over one-hundred different poems and other writings, has travelled through much of Europe, the Caribbean, and the United States and has been a reporter as well as worked with disadvantaged individuals in varied settings.

TV vet Dr Katrina Warren and her border collie Toby are well known around Australia as presenters on the hit show Harry's Practice. Viewers often comment on how clever Toby is, and fans have dubbed him The Wonderdog. In this book Katrina reveals the secrets to teaching Toby his tricks. With a little patience and a lot of love, you too can turn your dog into a Wonderdog! Containing 20 tricks to teach your dog and dazzle your friends, step-by-

step instructions and diagrams, and tips on caring for your dog all year round, Wonderdog is a must for all dog-lovers.

The Conscience of a Teacher encourages readers to think deeply about what actions are right for teachers to take in their work with students. Babbage asks teachers to concentrate on doing what is right and on being conscientious. Conscience, ethics, virtue, integrity, and honor are emphasized as well. This book is composed of many short essays which can be read separately; however, read together these commentaries form a compelling exploration of how and why teachers should obey laws, regulations, policies, and contractual obligations, yet should do much more. Why? The reasons include because it is right, because it is honorable, because it is virtuous, and because the conscience of a teacher demands a higher standard.
