In Sapiens, Dr Yuval Noah Harari spans the whole of human history, from the very first humans to walk the earth to the radical and sometimes devastating breakthroughs of the Cognitive, Agricultural and Scientific Revolutions.

New York Times Bestseller A Summer Reading Pick for President Barack Obama, Bill Gates, and Mark Zuckerberg From a renowned historian comes a groundbreaking narrative of humanity ' s creation and evolution—a #1 international bestseller—that explores the ways in which biology and history have defined us and enhanced our understanding of what it means to be “ human. ” One hundred thousand years ago, at least six different species of humans inhabited Earth. Yet today there is only one—homo sapiens. What happened to the others? And what may happen to us? Most books about the history of humanity pursue either a historical or a biological approach, but Dr. Yuval Noah Harari breaks the mold with this highly original book that begins about 70,000 years ago with the appearance of modern cognition. From examining the role evolving humans have played in the global ecosystem to charting the rise of empires, Sapiens integrates history and science to reconsider accepted narratives, connect past developments with contemporary concerns, and examine specific events within the context of larger ideas. Dr. Harari also compels us to look ahead, because over the last few decades humans have begun to bend laws of natural selection that have governed life for the past four billion years. We are acquiring the ability to design not only the world around us, but also ourselves. Where is this leading us, and what do we want to become? Featuring 27 photographs, 6 maps, and 25 illustrations/diagrams, this provocative and insightful work is sure to spark debate and is essential reading for aficionados of Jared Diamond, James Gleick, Matt Ridley, Robert Wright, and Sharon Moalem.

University Press returns with another short and captivating book - a brief history of our human species: Homo sapiens. All the humans who ever lived are extinct - except for Homo sapiens. We are, in Latin, the "wise humans." We are the sole survivors of a long and deadly battle against the forces of nature and time. The first humans - hominids - diverged from the other primates and began to walk upright on two legs some 3 million years ago. The first "modern" humans - Homo sapiens - diverged from the other hominids some 250,000 years ago. Since then, modern humans and our big brains migrated out of Africa, developed the capacity for language, domesticated animals, became farmers, learned to write, got religious, built cities, invented money, expanded empires, harnessed the scientific method, tried enlightenment, challenged authority, created machines, conquered the air, weaponized the atom, eliminated disease, walked on the moon, did the internet, made artificial intelligence, fed seven billion people, and speculated about the future of our species. This short book provides a captivating account of the noble, savage, sacred, mundane, heroic and heart-warming events that connect us with our earliest ancestors - an account that you can read in about an hour.

In Sapiens: A Brief History of Humankind, renowned historian Yuval Noah Harari chronicles both the creation and evolution of humankind. Harari recounts the manner in which both history and biology have defined and enriched our understanding of what truly being “ human ” means. Unlike most books that either utilize a biological or a historical approach in narrating the history of humankind, Sapiens opens at the

dawn of modern cognition approximately 70,000 years ago. From how human evolution has played a part in transforming the world's ecosystem to how empires and civilizations arose, Harari integrates science and history to reexamine generally accepted ideologies, link developments in the past to the matters of the present, and evaluate detailed events in a much wider perspective. We are entering a new age—an era where humans can not only successfully shape the world but also shape themselves. Where does this lead humankind? More importantly: what do you want to become?

Discover humanity's past and its future in this in this special e-book collection featuring Sapiens—a reading pick of President Barack Obama, Bill Gates, and Mark Zuckerberg—and its acclaimed companion Homo Deus.

**PATTERNED PLANET: SPECIAL EDITIONS OF GROUNDBREAKING SCIENCE BOOKS** Planet Earth is 4.5 billion years old. In just a fraction of that time, one species among countless others has conquered it. Us. We are the most advanced and most destructive animals ever to have lived. What makes us brilliant? What makes us deadly? What makes us Sapiens? In this bold and provocative book, Yuval Noah Harari explores who we are, how we got here and where we're going. Sapiens is a thrilling account of humankind's extraordinary history - from the Stone Age to the Silicon Age - and our journey from insignificant apes to rulers of the world. 'Unbelievably good. Jaw dropping from the first word to the last' Chris Evans, BBC Radio 2

Instant National Bestseller The first volume of the graphic adaptation of Yuval Noah Harari's smash #1 New York Times and international bestseller recommended by President Barack Obama and Bill Gates, with gorgeous full-color illustrations and concise, easy to comprehend text for adult and young adult readers alike. One hundred thousand years ago, at least six different species of humans inhabited Earth. Yet today there is only one—homo sapiens. What happened to the others? And what may happen to us? In this first volume of the full-color illustrated adaptation of his groundbreaking book, renowned historian Yuval Harari tells the story of humankind's creation and evolution, exploring the ways in which biology and history have defined us and enhanced our understanding of what it means to be “human.” From examining the role evolving humans have played in the global ecosystem to charting the rise of empires, Sapiens challenges us to reconsider accepted beliefs, connect past developments with contemporary concerns, and view specific events within the context of larger ideas. Featuring 256 pages of full-color illustrations and easy-to-understand text covering the first part of the full-length original edition, this adaptation of the mind-expanding book furthers the ongoing conversation as it introduces Harari's ideas to a wide new readership.

Official U.S. edition with full color illustrations throughout. **NEW YORK TIMES BESTSELLER** Yuval Noah Harari, author of the critically-acclaimed New York Times bestseller and international phenomenon Sapiens, returns with an equally original, compelling, and provocative book, turning his focus toward humanity's future, and our quest to upgrade humans into gods. Over the past century humankind has managed to do the impossible and rein in famine, plague, and war. This may seem hard to accept, but, as Harari explains in his trademark style—thorough, yet riveting—famine, plague and war have been transformed from incomprehensible and uncontrollable forces of nature into manageable challenges. For the first time ever, more people die from eating too much than from eating too little; more people die from old age than from infectious diseases; and more people commit suicide than are killed by soldiers, terrorists and criminals put together. The average American is a thousand times more likely to die from binging at McDonalds than from being blown up by Al Qaeda. What then will replace famine, plague, and war at the top of the human agenda? As the self-made gods of planet earth, what destinies will we set ourselves, and which quests will we undertake? Homo Deus explores the projects, dreams and nightmares that will shape the twenty-first century—from overcoming death to creating artificial life. It asks the fundamental questions: Where do we go from here? And how will we protect this fragile world from our own destructive powers? This is the next stage of evolution. This is Homo Deus. With the same insight and clarity that made Sapiens an international

hit and a New York Times bestseller, Harari maps out our future.

The bestselling book *Sapiens* takes the reader from humanity's remote origins in East Africa; through its spread to societies and empires around the world; and finally to the present, when *Sapiens* as we know them may be about to disappear. Throughout this journey, *Homo Deus* author Yuval Noah Harari offers new insights into the importance of language, imagination, and even ignorance in the development of human history. The summary and analysis in this ebook are intended to complement your reading experience and bring you closer to a great work of nonfiction.

Dan Ariely's three New York Times bestselling books on his groundbreaking behavioral economics research, *Predictably Irrational*, *The Upside of Irrationality*, and *The (Honest) Truth About Dishonesty*, are now available for the first time in a single volume.

This second volume of *Sapiens: A Graphic History*, the full-color graphic adaptation of Yuval Noah Harari's #1 New York Times bestseller, focuses on the Agricultural Revolution—when humans fell into a trap we've yet to escape: working harder and harder with diminishing returns. What if humanity's major woes—war, plague, famine and inequality—originated 12,000 years ago, when *Homo sapiens* converted from nomads to settlers, in pursuit of the fantasy of productivity and efficiency? What if by seeking to control plants and animals, humans ended up being controlled by kings, priests, and Kafkaesque bureaucracy? Volume 2 of *Sapiens: A Graphic History – The Pillars of Civilization* explores a crucial chapter in human development: the Agricultural Revolution. This is the story of how wheat took over the world; how an unlikely marriage between a god and a bureaucrat created the first empires; and how war, plague, famine, and inequality became an intractable feature of the human condition. But it's not all doom and gloom with this book's cast of entertaining characters and colorful humorous scenes. Yuval, Zoe, Prof. Saraswati, Cindy and Bill (now farmers), Detective Lopez, and Dr. Fiction, all introduced in Volume 1, once again travel the length and breadth of human history, this time investigating the impact the Agricultural Revolution has had on our species. The cunning Mephisto shows them how to ensnare humans, King Hammurabi lays down the law, and Confucius explains harmonious society. The origins of modern farming are introduced through Elizabethan tragedy; the changing fortunes of domesticated plants and animals are tracked in the columns of the *Daily Business News*; the story of urbanization is portrayed as a travel brochure, offering discount journeys to ancient Babylon and China; and the history of inequality unfolds in a superhero detective story; with guest appearances by historical and cultural personalities throughout such as Thomas Jefferson, Scarlett O'Hara, Margaret Thatcher, and John Lennon. *Sapiens: A Graphic History, Volume 2* is a radical, witty and colorful retelling of the story of humankind for adults and young adults, and can be read on its own or in sequence with Volume 1.
