This book contains the best papers of the Sixth International Conference on Enterprise Information Systems (ICEIS 2004), held in Porto (Portugal) and organized by INSTICC (Institute for Systems and Technologies of Information, Communication and Control) in collaboration with PORTUCALENSE UNIVERSITY, who hosted the event. Following the route started in 1999, ICEIS has become a major point of contact between research scientists, engineers and practitioners on the area of business applications of information systems. This conference has received an increased interest every year, from especially from the international academic community, and it is now one of the world largest conferences in its area. This year, five simultaneous tracks were held, covering different aspects related to enterprise computing, including: [Databases and Information Systems Integration], [Artificial Intelligence and Decision Support Systems], [Information Systems Analysis and Specification], [Software Agents and Internet Computing] and [Human-Computer Interaction]. The sections of this book reflect the conference tracks.

Discover how 25 powerful technology trends are transforming 21st century businesses How will the latest technologies transform your business? Future Tech Trends in Practice will give you the knowledge of today's most important technology trends, and how to take full advantage of them to grow your business. The book presents 25 real-world technology trends along with their potential contributions to organisational success. You'll learn how to integrate existing advancements and plan for those that are on the way. In this book, best-selling author, strategic business advisor, and respected futurist Bernard Marr explains the role of technology in providing innovative businesses solutions for companies of varying sizes and across different industries. He covers wide-ranging trends and provides an overview of how companies are using these new and emerging technologies in practice. You, too, can prepare your company for the potential and power of trending technology by examining these and other areas of innovation described in Future Tech Trends in Practice: Artificial intelligence, including machine and deep learning The Internet of Things and the rise of smart devices Self-driving cars and autonomous drones 3D printing and additive manufacturing Blockchain technology Genomics and gene editing Augmented, virtual and mixed reality When you understand the technology trends that are driving success, now and into the future, you'll be better positioned to address and solve problems within your organisation.

Most books on Supply Chain Management simply focus on how to move materials and key resources throughout an industrial enterprise. Reinventing Lean shows how SCM can be made [Lean, leading to much more reliable, cost-effective and competitive Supply Chain Management (SCM). In this book, the reader will find a collection of management tools that will help to implement Lean principles, and to understand the components of an integrated Supply Chain Management system. Moreover, the book will show that to make Lean SCM effective, both the functional management tools as well as an enterprise-wide cultural readiness are needed in order to lay the groundwork for a World Class Lean Supply Chain. Reinventing Lean will carefully lead engineers and manufacturing managers on how to adopt a cutting-edge Lean Supply Chain strategy. The book will lay out various proven approaches to incorporating Lean and SCM practices, by focusing on the ways in which SCM relates to materials, money, and information movement within the manufacturing environment. And because Reinventing Lean recognizes that a successful Lean SCM system cannot be achieved unless an organization supports team integration and the willingness to adapt to change, it provides not only the technical tools but also methods for changing company cultural factors that can make it all come together for a successful operation. Industrial engineers and plant managers, with strong backgrounds in SCM, will learn how lean management principles can be utilized to make their organizations leaner, more efficient, and more competitive Readers will find out how to lay out various approaches to incorporating Lean and SCM practices Readers can learn how to customize a cutting-edge Lean Supply Chain strategy which will give a distinct advantage over the competition

Bringing together market research reports, business analyst briefings, and technology references into one comprehensive volume, Business Intelligence for Telecommunications identifies those advances in both methods and technology that are being employed to inform decision-making and give companies an edge in the rapidly growing and highly co

Computer Security: Principles and Practice, 2e, is ideal for courses in Computer/Network Security. In recent years, the need for education in computer security and related topics has grown dramatically [] and is essential for anyone studying Computer Science or Computer Engineering. This is the only text available to provide integrated, comprehensive, up-to-date coverage of the broad range of topics in this subject. In addition to an extensive pedagogical program, the book provides unparalleled support for both research and modeling projects, giving students a broader perspective. The Text and Academic Authors Association named Computer Security: Principles and Practice, 1e, the winner of the Textbook Excellence Award for the best Computer Science textbook of 2008.

Management Information Systems provides comprehensive and integrative coverage of essential new technologies, information system applications, and their impact on business models and managerial decision-making in an exciting and interactive manner. The twelfth edition focuses on the major changes that have been made in information technology over the past two years, and includes new opening, closing, and Interactive Session cases.

Covers the strategic management topics in cost accounting. This title helps students to understand about the management and the role of cost accounting in helping an organization succeed. It addresses issues such as: How does a firm compete? and What type of cost management information is needed for a firm to succeed?

This book contains the papers presented at the 5th International Conference on Practical Aspects of Knowledge Management organized by the Department of Knowledge Management, Institute of Computer Science and Business Informatics, University of Vienna. The event took place on December 02/03, 2004 in Vienna. The PAKM conference series offers a communication forum and meeting ground for practitioners and researchers engaged in developing and deploying advanced business solutions for the management of knowledge and intellectual capital. Contributions pursuing integrated approaches which consider organizational, technological and cultural issues of knowledge management have been elected for presentation. PAKM is a forum for people to share their views, to exchange ideas, to develop new insights, and to envision completely new kinds of solutions for knowledge management problems. The accepted papers are of high quality and are not too specialized so that the main issues can be understood by someone outside the respective field. This is crucial for an interdisciplinary exchange of ideas. Like its predecessors, PAKM 2004 featured two invited talks. It is a real joy seeing the visibility of the conference increase and noting that knowledge management researchers and practitioners from all over the world submitted papers. This year, 163 papers and case studies were submitted, from which 48 were accepted.

Providing a comprehensive framework for a sustainable governance model, and how to leverage it in competing global markets, Governance, Risk, and Compliance Handbook presents a readable overview to the political, regulatory, technical, process, and people considerations in complying with an ever more demanding regulatory environment and achievement of good corporate governance. Offering an international overview, this book features contributions from sixty-four industry experts from fifteen countries.
