Speedometer/Tachometer gauge air core stepper motor with ...

A stepper motor, also known as step motor or stepping motor, is a brushless DC electric motor that divides a full rotation into a number of equal steps. The motor's position can then be commanded to move and hold at one of these steps without any position sensor for feedback (an open-loop controller), as long as the motor is carefully sized to the application in respect to torque and speed.

Stepper motors are common in many hobby projects, such as robots and radio-controlled tanks. Through a series of pulses to the motor, a
mechanism has the potential to be controlled with great precision. Proper control by the user depends upon properly functioning stepper
motors. From the technical perspective, this means that all sets of motor windings must be usable. Ensuring a properly ...
