10w40 synthetic race oil by Suzuki. I have an 05 rmz450 as well. We only need one oil since our tran and motor oil is all the same. You don't have to use synthetic, but I prefer to use the top products in my bike. Just make sure you use the oil that's made for both. No just a straight tran oil or motor oil...makes lofe easier with one though!

Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.

Guy Martin, lorry mechanic, motorcycle racing legend and favourite of the Isle of Man TT, lives for the buzz he feels racing his bike round terrifying bends at 200mph. Nothing, he claims, can match it. Or can it? Guy is about to find out ... Guy faces four dangerous and thrilling speed record challenges, pushing the boundaries of speed, and his body, to determine just how fast one man can go. Together with the best of British engineering and design, scientific research, ground breaking technology and a Gold-medal-winning athlete or two, Guy attempts to pedal a bicycle over 100mph by using the slipstream of an articulated lorry; build the world's fastest human-powered aircraft; hydroplane a modified motocross bike across a two kilometre lake and become the fastest man on a toboggan. Tying in with the Channel 4 television series, Speed offers the inside track – the feats of engineering, the science behind the speed, the history of the challenges and Guy's adrenaline fuelled, jaw-dropping attempts to break the records. How do you create an aeroplane frame that's super light but safe enough to crash? What should you fill your bicycle tyres with if common air will explode under the heat of 100mph speeds? And why is the shape of a peregrine falcon the ideal model for a toboggan? Exploring aerodynamics, surface tension, friction, gravity and ground effect, Guy discovers how and why things go really fast.
