McIntosh's study, the most complex and richly drawn portrait of any English community in this period, goes beyond local history in illuminating the transition from medieval to early modern life. A Community

modular "Principles in Psychology Series", designed for A-level and other introductory courses, aiming to provide students embarking on psychology courses with the necessary background and context. One

aspect of this is to consider contemporary psychology in the light of its historical development. Another aspect is to examine some of the major controversies which have dominated psychology over

the centuries. Yet another aspect is to consider some of the major areas of psychology eg social, developmental, cognitive in terms of what they have to offer in the quest for an understanding of human

behaviour.; The book also addresses key issues which need to be considered as psychology matures into a fully fledged experimental and scientific discipline. For example, how much do laboratory experiments tell

us about how people behave
in the real world? And how

psychologists to go in their
pursuit of knowledge?
