Cooking made possible the agrarian mode of production, based on food storage. Even earlier, cooking widened the range of available food species and therefore of habitats, its origins traceable to the use of the first stone cook's knife. Cooking has often been depicted as part of women's housework, which supports "real" (male or public) production.

~~Cooking | Eneyelopedia.com~~

Cooking is the process of producing safe and edible food by preparing and combining ingredients, and (in most cases) applying heat. Cooking is a means of processing food, without which many foods would be unfit for human consumption. 1. Why do we cook food? 1.1. Safety
