This is one of the easier items on the try stick to carve as it simply requires baton and pry. You simply start on one side of the stick and baton each side of the area you want at a 90 degree and pry the area in between leaving you with a 90 degree plain.

One of the ways I've been trying to improve my knife skills is by making "Try Sticks". This is an idea from Mors Kochanski that quote: The purpose behind the try stick is to practice and demonstrate the skillful use of the knife as a wood carving tool, as well as to learn some of the practical operations that may be used in wilderness living.

It's hard to try new things—for adults as well as children. It's even harder to stay the course when something is more difficult than we thought it would be, or when things don't work out the way we hoped. Yet flexibility and perseverance are essential to success in all areas of life, at all ages and stages. This book introduces children to the benefits of trying something new and the basics of stick-to-it-iveness. Includes suggestions adults can use to reinforce the ideas and skills being taught.

#1 Wall Street Journal Bestseller An award-winning psychologist and director of the UCLA Center for Digital Behavior shows everyone how to make real, lasting change in their lives in this exciting work of popular psychology that goes beyond The Power of Habit with science and practical strategies that can alter their problem behaviors—forever. Whether it's absent-minded mistakes at work, a weakness for junk food, a smart phone addiction, or a lack of exercise, everyone has some bad habit or behavior that they'd like to change and actually doing it—and sticking with it—are two very different things. Dr. Sean Young, an authoritative new voice in the field of behavioral science, knows a great deal about our habits—how we make them and how we can break them. Stick with It is his fascinating look at the science of behavior, filled with crucial knowledge and practical advice to help everyone successfully alter their actions and improve their lives. As Dr. Young explains, you don't change behavior by changing the person, you do it by changing the process. Drawing on his own scientific research and that of other leading experts in the field, he explains why change can be difficult and identifies the crucial forces that combine to motivate change. He also helps us understand how the mind often interferes with creating lasting change and how we can outsmart it, including using "neurohacks" to shortcut the brain's counterproductive instincts. In addition he provides a powerful corrective to the decades old science of habits, offering a next generation discussion of how habits can change behavior with the right approach. Packed with pragmatic exercises and stories of real people who have used them successfully, Stick with It shows that it is possible to control spending, stick to a diet, become more social, exercise regularly, stop compulsively checking e-mail, and overcome problem behaviors—forever.

NEW YORK TIMES BESTSELLER • The instant classic about why some ideas thrive, why others die, and how to make your ideas stick. "Anyone interested in influencing others—to buy, to vote, to learn, to diet, to give to charity or to start a revolution—can learn from this book."—The Washington Post Mark Twain once observed, "A lie can get halfway around the world before the truth can even get its boots on." His observation rings true: Urban legends, conspiracy theories, and bogus news stories circulate effortlessly. Meanwhile, people with important ideas—entrepreneurs, teachers, politicians, and journalists—struggle to make ideas stickier, such as applying the human scale principle, using the Velcro Theory of Memory, and creating curiosity gaps. Along the way, we discover that sticky messages of all kinds—from the infamous "kidney theft ring" hoax to a coach's lessons on sportsmanship to a vision for a new product at Sony—draw their power from the same six traits. Made to Stick will transform the way you communicate. It's a fast-paced tour of success stories (and failures): the Nobel Prize-winning scientist who drank a glass of bacteria to prove a point about stomach ulcers; the charities who make use of the Mother Teresa Effect; the elementary-school teacher whose simulation actually prevented racial prejudice. Provocative, eye-opening, and often surprisingly funny, Made to Stick shows us the vital principles of winning ideas—and tells us how we can apply these rules to making our own messages stick.

Discusses the best methods of learning, describing how rereading and rote repetition are counterproductive and how such techniques as self-testing, spaced retrieval, and finding additional layers of information in new material can enhance learning.
