This book introduces the students, researchers and practitioners into the subject and enabling technologies and applications pertaining to of technology, entrepreneurship and business development through research articles, case studies etc. It is primarily intended for academic purposes for learners of computer Science, management, accounting and information systems disciplines, economics,- entrepreneurship. Publishing chapters in the book is new innovative idea to spread the book in the Middle East and Arab countries and make the book achieve more sales. As many students in all levels, graduates and undergraduates in addition to research, professionals are not able to get sufficient resources because of the language concern.

Controversy in Science Museums focuses on exhibitions that approach sensitive or controversial topics. With a keen sense of past and current practices, Pedretti and Navas Iannini examine and re-imagine how museums and science centres can create exhibitions that embrace criticality and visitor agency. Drawing on international case studies and voices from visitors and museum professionals, as well as theoretical insights about scientific literacy and science communication, the authors explore the textured notion of controversy and the challenges and opportunities practitioners may encounter as they plan for and develop controversial science exhibitions. They assert that science museums can no longer serve as mere repositories for objects or sites for transmitting facts, but that they should also become spaces for conversations that are inclusive, critical, and socially responsible. Controversy in Science Museums provides an invaluable resource for museum professionals who are interested in creating and hosting controversial exhibitions, and for scholars and students working in the fields of museum studies, science communication, and social studies of science. Anyone wishing to engage in an examination and critique of the changing roles of science museums will find this book relevant, timely, and thought provoking.

Views from Pulau Pinang brings together the writings of members of the Centre for Policy Research and International Studies (CenPRIS), Universiti Sains Malaysia, with the aim of providing critical and alternative perspectives at the nexus between academia and policy discourse. Divided into three parts, the book tackles issues of ' Social Science, Development, and Countering Modern Orientalism ' , ' Othering Globalisation: Rights and the Image of Islam ' and ' Education, Nation-building, and Society. ' Relating back to the history and intellectual traditions of Pulau Pinang it seeks to situate themes of knowledge production and social science research within a geographic space which has itself long been subject to forces of orientalism, colonisation, modernisation, developmentalism, globalisation, nationalism and intellectual captivity, but also forces of decolonisation, anti-orientalism and localism. Views from Pulau Pinang explores these forces in the context of nation-building, development and education, calling for new approaches to urbanization and the relationship between the city and kampung, the university system and the digital revolution, and the nation-state and governance. Moreover it highlights the importance of innovative social science research to policy thinking for the future of Malaysia.

Journal of Education and Learning (EduLearn) is an interdisciplinary international journal of original research and writing on education. The EduLearn aims to provide a forum for scholarly understanding of the field of education and plays an important role in promoting the process that accumulated knowledge, values, and skills are transmitted from one generation to another; and to make methods and contents of evaluation and research in education available to teachers, administrators and research workers Critical Analysis of the Supportive and Suppressive Factors for the Children ' s Literature Program in Malaysia Siti Salina Mustakim, Ramlee Mustapha, Othman Lebar 1 Assessment on Hybrid e-Learning Instrument Intan Farahana Kamsin, Rosseni Din 11 Open & Distance Learning (ODL) and Agricultural Extension Workers ' Social Competence in Indonesia Nurul Huda 17 Preparedness of Colleges of Education in Southwestern Nigeria for the Adoption of Blended Learning Olayiwola Idowu Olusola, Alimi Kudirat Mojirade 25 Initial Oral English Communication Needs of Learners in the BE Classroom Paramudia, Hadina Habil 35 The Influence of Netspeak on Students ' Writing Shalini Thangaraj, Mahendran Maniam 45 The Relationship between Multiple Intelligences with Preferred Science Teaching and Science Process Skills Mohd Ali Samsudin, Noor Hasyimah Haniza, Corrienna Abdul-Talib, Hayani Marlia Mhd Ibrahim 53 The Effect of Personality Value of Principals toward Attitude, Discipline, Qualities and Communications of Work Muhammad Asri, Lokman Bin Mohd Tahir 61 Causes, Effects of Stress, and the Coping Mechanism of the Bachelor of Science in Information Technology Students in A Philippine University Generoso N. Mazo 71 How to Develop Character of Madrassa Students in Indonesia Lukman Abu, Mahani Mokhtar, Zainudin Hassan & Siti Zakiah. D.S. 79

This book features more than 95 papers that were presented at the bi-annual Regional Conference on Science, Technology and Social Sciences, RCSTSS 2014, which was organized by Universiti Teknologi MARA Pahang. It covers topics ranging from communications studies, politics, psychology, education, religious studies as well as business and economics. The papers, which have been carefully reviewed, include research conducted by academicians locally, regionally and globally. They detail invaluable insights on the important roles played by the various disciplines in science, technology and social sciences. Coverage includes accounting, art and design, business, communication, economics, education, finance, humanity, information management, marketing, music, religion, social sciences and tourism. Throughout, clear illustrations, figures and diagrams complement the research. The book is a significant point of reference to academicians and students who want to pursue further research in their respective fields. It also serves as a platform to disseminate research findings as a catalyst to bring out positive innovations on the development of the region.

Written by leaders in a wide range of creative fields and from all corners of the Asian region, this collection of essays presents arts and education programs which reflect traditional and contemporary practices. The volume aims to encourage the use of the arts in developing international understanding, celebrating cultural diversity, building cultural bridges and creating cross-cultural dialogue throughout the Asian region.

The Association of Southeast Asian Institutions of Higher Learning (ASAIHL) has been playing an important role in educational development to promote innovative teaching, research and cooperation among institutions of higher learning. Build Bright University (BBU), Cambodia had organized the 2015 ASAIHL International Conference during 2-4 December at Siem Reap. The main theme of the conference was " Educational Access and Excellence " . The conference covered three sub-themes, namely, (i) cross-border higher education in global context, (ii) excellence in education through provision of technology, effective teaching and research, and (iii) student learning outcomes. Delegates from France, UK, Japan, Singapore, Hong Kong, India, Thailand, Malaysia, Philippines, Vietnam, Taiwan, East Timor, Cambodia and others had participated in the conference.

This book shares insights into the various ways technology can be used for educational purposes, utilizing an approach suitable for both novice and advanced practitioners in this niche area. It features selected papers presented at the International Conference on e-Learning 2015 (ICel. 2015), where professionals discussed how technology can not only serve as a tool in the classroom, but as the classroom itself. As the title " Envisioning the Future of Online Learning " suggests, this book showcases current best practices in the field of e-learning, where technology has been leveraged to re-engineer the landscape of education, particularly in the context of Malaysia.

Most of the chapters in this volume were first presented at the Penang Outlook Forum 2009, held on 1-2 June 2009 at the E&O Hotel in Penang. A few others have been added to complement those at the conference. At present, comprehensive and authoritative studies on Penang's current economic conditions are a rarity. This book is thus an effort to correct that lack. Evidence does suggest that the state had not been doing well in the first half of the first decade of the new millennium. Being a small state situated relatively far away from the administrative capital of Putrajaya, Penang has to be economically innovative if it is to regain its place at the forefront of Malaysian development. The relationship between the state and the federal government remains a vital matter.
