Introduction to Recreation Services for People With Disabilities continues to reflect a broad-based explanation of the role of practitioners in the interrelated fields of therapeutic recreation, inclusive recreation, and special recreation. This fourth edition represents a major revision, including the most current research and thinking about the interdisciplinary fields of recreation and disability studies. This book is intended to be an introductory text for all students in parks and recreation/leisure studies departments. Every student, whether she or he intends to work in a provincial park or a state hospital, a community recreation center or a community mental health center, a public school or a cruise ship, needs a basic level of knowledge about people with disabilities. The central theme of this book is that people with disabilities are people who have the same needs and wants as anyone else and deserve the right to be at the center of their services. Each person with a disability is a person first, not a disability. Recreation services must be centered around the person who is being served. That is, whether treatment-oriented recreation therapy, goal-oriented special recreation, or activity-oriented inclusive recreation, it is the person and not the professional or even the activity that must be at the center of service delivery. It is our hope that you will begin to see people with disabilities as people as you learn about recreation and therapeutic recreation services. If you emerge from this book (or your class) with this person-centered knowledge, then you will have learned a lot about how to provide recreation services to people with disabilities. Whether or not you happen to be a person with a disability, our more earnest hope is that you will emerge with a commitment to ensure that people with disabilities are treated as people who are at the center of their programs and services. This means that you will become an advocate, maybe even a zealot, on behalf of people with disabilities. You will encourage friends and colleagues to use people-first and respectful language. You will refrain from jokes that perpetuate stereotypes. You will be part of a new breed of recreation and therapeutic recreation professionals who celebrate differences and strive to provide person-centered and responsive services.

These proceedings summarize the best papers in each research area represented at the 2015 Annual Meeting of the German Gesellschaft für Arbeitswissenschaft, held at Karlsruhe Institute of Technology (KIT) from February 26-28. The meeting featured more than 160 presentations and 30 posters reflecting the diversity of subject matter in the field of human and industrial engineering.

I have physical scars from past surgeries, however, I have emotional scars as well. They were buried deep inside (hidden). It wasn't until my mother died was I able to "catch my breath" and to make sense of or process the emotional pain I had endured due to her prescription drug addiction, resulting in my own addictions.

This fully updated book offers a compact and accessible account of EU intellectual property (IP) law and policy. The digital age brings many opportunities, but also presents continuing challenges to IP law as the EU ' s programme of harmonisation unfolds. As well as addressing the main IP rights (copyright, patents, designs, trade marks and related rights), the book also considers IP ' s relationship with the EU ' s rules on free movement of goods and competition, as well as examining the enforcement of IP rights. Taking account of numerous changes, this timely second edition covers the substantive provisions and procedures which apply throughout the EU, making extensive reference to the case law. The author considers how the exploitation of IP is increasingly global; harmonisation, in contrast, is only partial, even at the EU level. In response, the book sets EU IP law in its wider international context. It also seeks to highlight policy issues and arguments of relevance to the EU, in its relations both within the Union and with the rest of the world. Designed as a compact and approachable account of these difficult and technical areas, and with advice on further reading and research, this unique book is useful both as a work of reference and for more general study. It is essential reading for postgraduate students, academic researchers and legal practitioners alike.

The Report is an annual report, which is presented for the first time this year. It currently comprises 25 national reports regarding each state and the tendencies of Islamophobia in each respective country.

Each year in America, 2 Million criminals break into homes just like yours. Is your aim good enough to guarantee your family's safety?This book has been teaching responsible gun owners the same effective techniques that created the world's deadliest snipers. The new 2nd edition has been redesigned to give you the most powerful methods in easy-to-follow instructions.A retired US Navy SEAL and bestselling author, Chris was hand-selected to develop the entire curriculum for the US Navy SEAL Sniper training program. If the US Navy SEALs selected him as their leading firearms instructor, shouldn't you?Now, you can use these world-class techniques to master your weapon and protect your family.It comes with access to 12 online video lessons. Watch Chief Sajnog show you his real-world methods, and read detailed explanations in this book packed with the most effective firearms training you'll ever find, without any of the fluff. If you're looking for "cool" stories or techniques, this is not the book for you. If you want to shoot like a Navy SEAL, this is where to start. You'll learn: How to find the right position for you -- not the cookie-cutter methods that only work for some people -- so you can maximize your aim with as little effort as possible. Simple training exercises you can do right now, at home, without having to spend 1,000's of dollars at the shooting range. How to boost your accuracy by up to 95% -- using the "Navy SEAL focus" technique that you can master in just minutes. The SEAL Sniper Trick that you can start using today, allowing you to instantly hit targets at twice the distance. Why the aiming technique you were taught is completely wrong -- and how you can fix it instantly. Plus... how to do all of this safely, without risking harm to your family.Protect your loved ones, your country, and yourself, with the firearms techniques developed by one of the most respected firearms trainers in the world.

An overview of the development of small arms from the simple matchlock musket to the modern assault rifle. Includes full color photographs.
